Serial No. 10/727,727

Art Unit: 1774

## In the Claims:

Please enter the following amended claim in the application. This listing of claims will replace all prior versions, and listings, of claims in the application.

## **Listing of Claims:**

comprising:

- 1. (Previously Presented): A method of coating a glass substrate, said method comprising:
  - (a) providing a glass substrate;
  - (b) applying to the glass substrate a coating composition
    - (1) from 1% to 98% by weight of a solventless, epoxy resin, reaction product of epichlorohydrin and at least one component selected from the group consisting of bisphenol A and bisphenol F, which reaction product is liquid at 20°C;
    - (2) from 1% to 98% by weight of a water-dilutable epoxy resin hardener;
      - (3) from 1% to 98% by weight of water; and
      - (4) optionally additives; and
    - (c) curing the coating composition.
  - 2. (Canceled)
  - 3. (Canceled)
  - 4. (Original): The method according to claim 1, wherein the epoxy

resin reaction product comprises a reaction product of epichlorohydrin and bisphenol A.

- 5. (Original): The method according to claim 1, wherein the glass substrate comprises a glass fiber.
- 6. (Previously Presented): A coated glass fiber prepared by the process comprising:
  - (a) providing a glass fiber to be coated;
- (b) providing a coating composition comprising: a solventless, liquid at 20°C, epoxy resin reaction product of epichlorohydrin and at least one component selected from the group consisting of bisphenol A and bisphenol F in an amount of from 1 to 98% by weight, a water-dilutable epoxy resin hardener in an amount of from 1 to 98% by weight;
- (c) applying the coating composition to at least a portion of the glass fiber; and
  - (d) curing the coating composition.
  - 7. (Canceled)
- 6. (Original): The coated glass fiber according to claim 6, wherein the epoxy resin reaction product comprises a reaction product of epichlorohydrin and bisphenol A.
- 9. (Currently Amended): A method of reinforcing synthetic fiber, said method comprising:
  - (a) providing a synthetic fiber;

Serial No. 10/727,727

Art Unit: 1774

- (b) providing a coated glass fiber according to claim 6; and
- (c) combining the synthetic fiber and the coated glass fiber; whereby, a synthetic fiber reinforced with a coated glass fiber is formed.
- 10. (Previously Presented): A composite material comprising the coated glass fiber according to claim 6.
- 11. (Previously Presented): The method of claim 1 wherein the coating composition is cured at ambient temperatures.
- 12. (Previously Presented): The coated glass fiber of claim 6 wherein the coating composition is cured at ambient temperatures.
